

Demonstration of proposed features:

User Authentication: Users can log in securely with their corporate credentials.

Travel Request Submission: Employees can fill out a form detailing their travel plans, including dates, purpose, destination, and budget.

Approval Workflow: Submitted requests are sent to managers or designated approvers for review and approval.

Notifications: Automatic notifications to employees on the status of their travel requests.

Budget Tracking: Monitoring and managing travel budgets to ensure compliance.

Reporting: Generate reports on travel expenses, approvals, and trends for management review.

Dashboard: A centralized dashboard for admins to oversee all travel requests and approvals.

This kind of application would streamline the process, reduce paperwork, and offer better tracking and management of corporate travel.
