

**Model performance metrics:**

1. **User Adoption Rate:** Measure the percentage of employees using the application regularly.
2. **Approval Time:** Monitor the time taken for managers to approve or reject travel requests.
3. **Travel Cost Optimization:** Evaluate the application's impact on reducing travel expenses.
4. **User Satisfaction:** Gather feedback from users to assess their satisfaction with the application's features and usability.
5. **Error Rate:** Track the frequency of errors or issues encountered by users during the approval process.
6. **Compliance Rate:** Monitor the adherence to corporate travel policies and regulations by employees using the application.
7. **Efficiency Improvement:** Analyze how much the application streamlines the travel approval process compared to traditional methods.
